Essential shower fittings from Ideal Bathrooms

Ideal Bathrooms' latest Essential shower fittings offer the high quality, excellent design and keen pricing synonymous with this range.

Angel is a mid-priced exposed dual control thermostatic bar mixer traditionally styled with a large fixed showerhead and rose. Victoria offers the same features with a modern twist plus head and diverter for use as a hand shower. At the luxury end of the market Niagra is a concealed thermostatic dual control fitting with a large fixed head; while Glymur is a concealed/built in concentric thermostatic mixer with a large fixed head and rose. Serio is an exposed mini concentric thermostatic mixer with a riser rail and hand designed for the mid-market sector. Venta is a concealed/built in thermostatic concentric mixer with riser rail and handset for the mid to upper sector. Narva and Ravana are exposed thermostatic bar mixers with riser rail and handset targeted at the price conscious consumer.

New solvent-free polished surface protector joins Fila Green Line

Fila has introduced a new solvent-free, stain-proofing protector – FILAMP90 ECO PLUS. Launched at Cersaie 2013, the new high performance sealant is LEED-approved and developed for polished porcelain and natural stone surfaces. It can be applied internally and externally – with some residual moisture - and its water-based formula cuts application time by up to 80%. Fila MP90 ECO is also GEV-EMICODE EC1PLUS certified and suitable for contact with foodstuffs.

New FILAMP90 ECO PLUS joins Fila's Green Line – a range of water-based, biodegradable products that have a very low VOC content. It provides protection against stains, without forming a film or altering natural surface colour. As well as sealing a variety of surfaces, including tiles, vanity units and kitchen work surfaces, Fila MP90 ECO PLUS can also provide weather and anti-graffiti protection outdoors. It is available in 250ml, one litre and five litre containers; one litre of product

provides approx. 30m² coverage on stone and 30-40m² coverage on porcelain.

For more information about Fila's surface care solutions, please see contact details below.

Business never better for Curved Door Specialist – Curve Craft

The difficult economy of the last few years has made many furniture manufacturers consider more closely the efficiency of their manufacturing processes in order to achieve the best possible margins. At the high end of the KBB market this often entails putting difficult and time consuming manufacturing requirements, like curved doors and curved accessories out to specialists such as Curve Craft.

Paul Murray (pictured right), Curve Craft's Managing Director comments "Bespoke manufactures are always surprised to find that we can manufacture solid timber, curved doors, in matching materials and finishes far cheaper than they can. They then consider the extensive amount of time it takes them to manufacture a curved door compared to a flat door and they soon realise that to try and handle such a requirement in house simply doesn't make economical sense."

At their specialist workshops located in County Down, Northern Ireland, Curve Craft find themselves not only working with local manufacturers, but also, many high end brands to include in-frame manufactures right across the UK, taking away the strain of manufacturing curved doors and components; an increasingly popular feature of today's modern, contemporary and traditional kitchen.

Paul Murray believes that product development and flexibility has played a large part in the increased demand for their service. "We can do in-frame or lay on door as well as doors in any size, shape, profile or thickness. For manufacturer's who wish us to supply doors ready for them to paint, we can supply in high quality MDF or solid maple; anything is possible".

Curve Craft's flexibility is further demonstrated in their ability to handle all of a clients curved component requirements. Cabinets / carcasses,

frames, cornice and light pelmets are all possible; even curved glazed doors.

Curve Craft offer a 3 week delivery for standard door sizes and just 5 weeks for non standard sizes.
